A model of how a shell grows can be made using enlarged copies of the same triangle.
Here is a model.

What is the value of x ?

32

The surface area of a box is given by the rule:

$$\text{total surface area} = 2 \times [(\text{width} \times \text{height}) + (\text{width} \times \text{length}) + (\text{height} \times \text{length})]$$

The box shown has a total surface area of 768 square centimetres.

What is the **height** of the box? centimetres
